

3 metre/118 inch roller blind uni-colour fabrics from Almedahls in black-out and translucent now on the launch pad

Almedahls aims to be able to support our customers with all their needs in roller blind fabrics. From the basic high-volume uni-colour fabrics to the design-rich textures and prints which are uniquely our signature products in roller blind textiles.

To complement our large existing range of uni-colour products we will, over the summer, launch a new selection of fabrics in 3 metre/118 inch width.

Initially, we will offer a range of black-out and translucent products in 8 best-selling colours. In total a choice between 21 products divided between 13 black-outs and 8 translucent fabrics.

The 3 metre/118 inch selection will match the colour tones in our popular uni-colour Polar roller blind fabric. Polar is already available in a 2 metre/79 inch, as well as a 2.35 metre/93 inch-version.

In combination this product family of 2-metre, 2.35-metre, and 3-metre uni-colour fabrics will offer:

- A proven high and consistent level of quality
- The choice of width which delivers the highest fabric yield for your specific purpose or project
- An affordable price for a very competitive price-to-quality ratio
- Suitability for digital printing

For more information about the upcoming 3-metre range, please contact a member of our sales team at [www.almedahls/about us/ sales and showrooms](http://www.almedahls/about-us/sales-and-showrooms).
